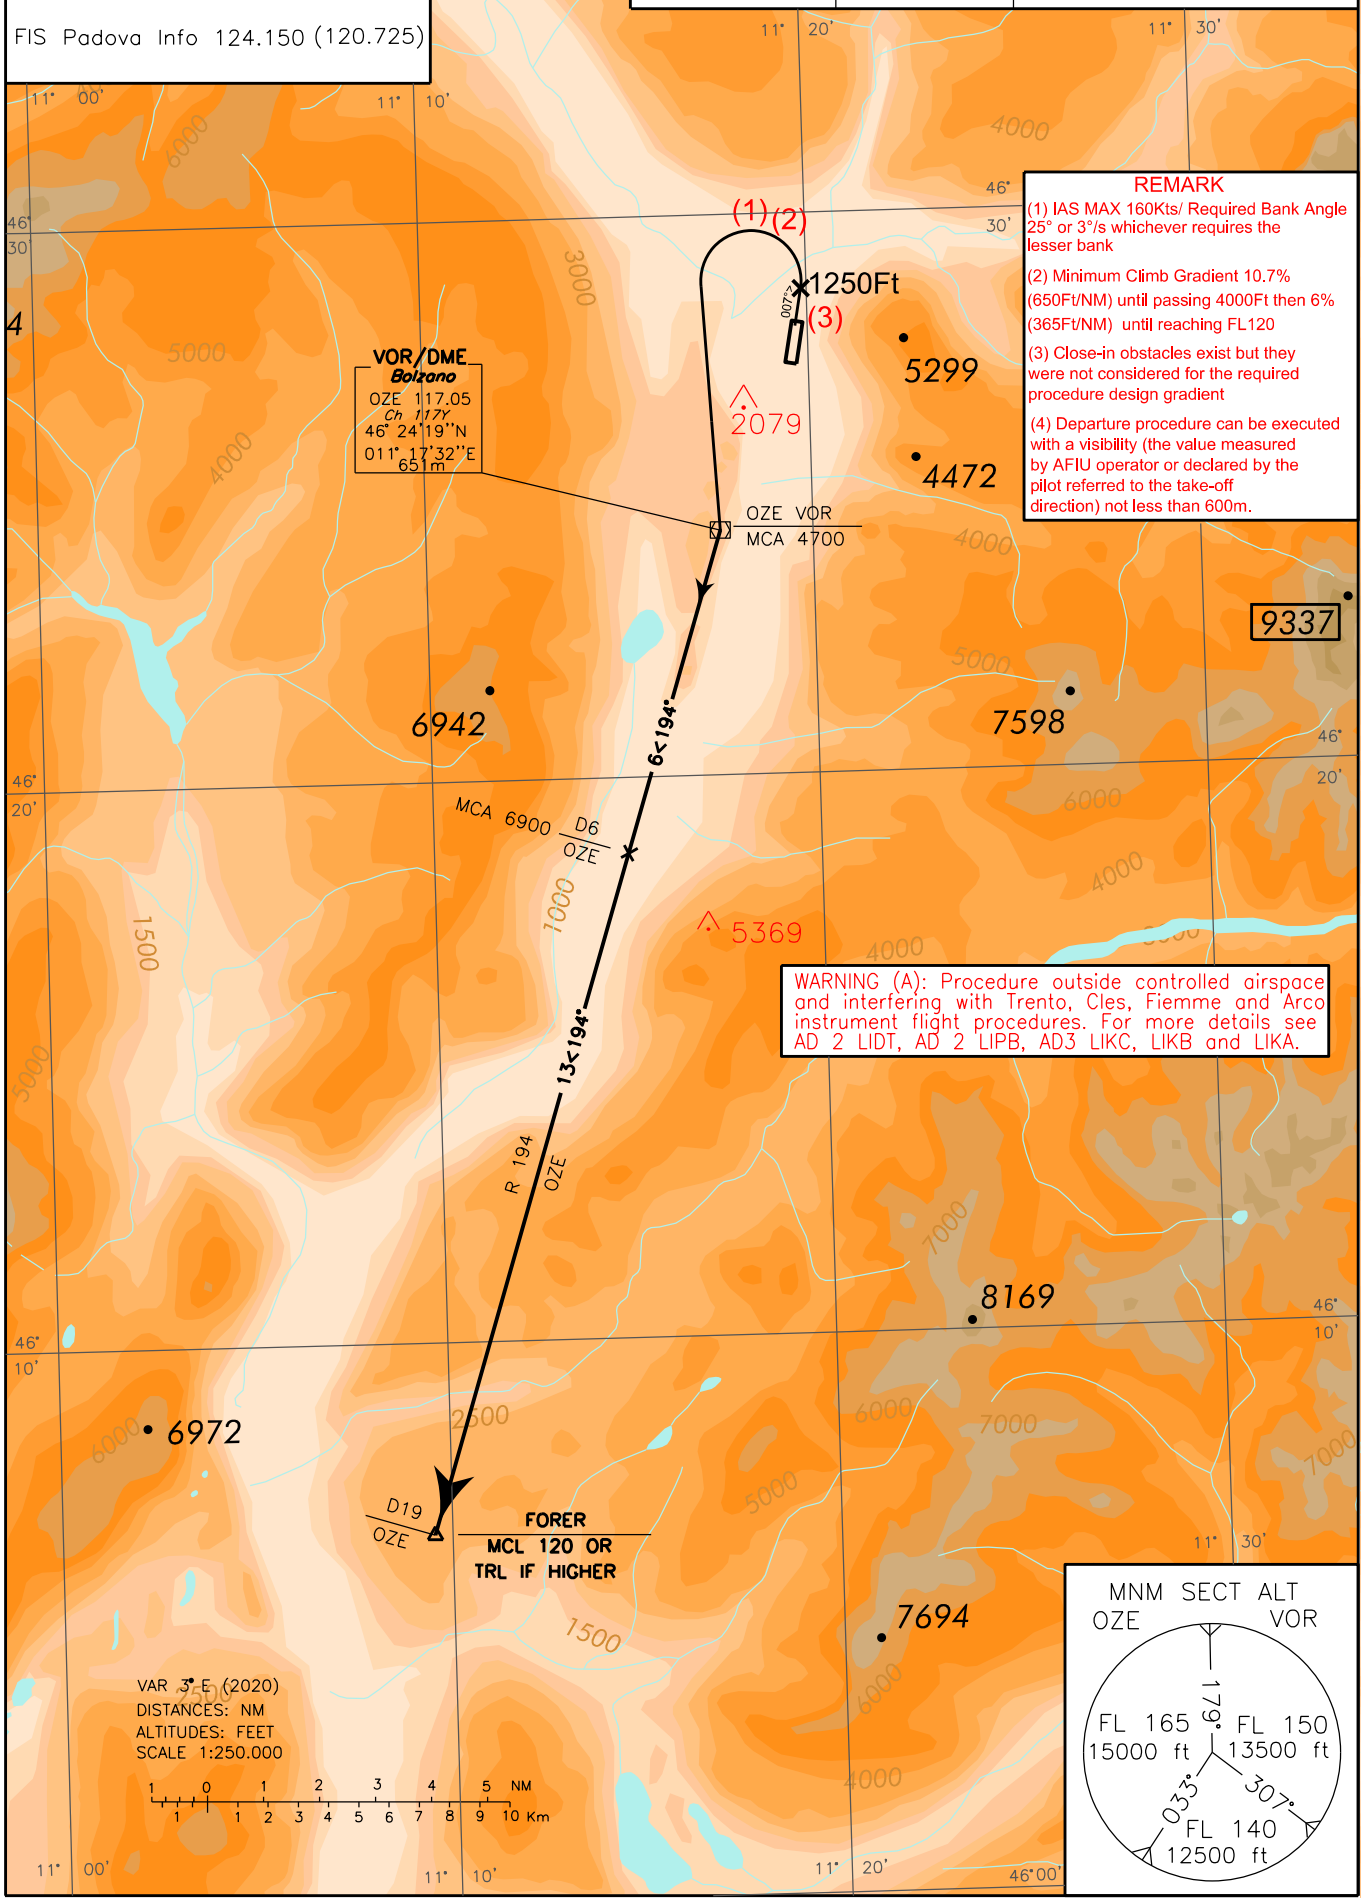
NOT STANDARD ICAO

CHANGE: REMARK 4 ADDED

FREQUENCIES		
AFIS Bolzano Aerodrome Info	120.600	
FIS Padova Info	124.150	(120.725)

INITIAL CLIMB PROCEDURES	RWY 01 Cat A/B/C	BOLZANO
		TRANSITION ALT 10000



REMARK

(1) IAS MAX 160Kts/ Required Bank Angle 25° or 3°/s whichever requires the lesser bank

(2) Minimum Climb Gradient 10.7% (650Ft/NM) until passing 4000Ft then 6% (365Ft/NM) until reaching FL120

(3) Close-in obstacles exist but they were not considered for the required procedure design gradient

(4) Departure procedure can be executed with a visibility (the value measured by AFIU operator or declared by the pilot referred to the take-off direction) not less than 600m.

WARNING (A): Procedure outside controlled airspace and interfering with Trento, Cles, Fiemme and Arco instrument flight procedures. For more details see AD 2 LIDT, AD 2 LIPB, AD3 LIKC, LIKB and LIKA.
