

TRANSITION ALTITUDE 4000 ft

TWR 123.250
APP 126.050PBN REQUIREMENTS
Nav. Spec.: RNP 1 / GNSS ONLY

Climb on heading 194° until passing 500FT; continue on course 194° to fly by SK191; then track to fly by SK192.

Thence for

SIGFO 1F: track to SIGFO to cross at or above FL085. MAX IAS 200 KT until SK192; MAX IAS 250KT until SIGFO.

ETEKA 1F: track to ETEKA to cross at or above FL095. MAX IAS 200 KT until SK192; MAX IAS 250KT until ETEKA.

For the two previous SIDs a minimum climb gradient of 4.0% (243FT/NM) until passing 500FT is required - due to elevation of about 240FT to the left of the extended RWY C/L, and - for coding purposes.

EVIKO 1F: track to fly by SKP; then track to EVIKO to cross at or above FL095. MAX IAS 200 KT until SK192; MAX IAS 250KT until EVIKO.

IBIDI 1F: then track to IBIDI to cross at or above FL075. MAX IAS 200 KT until SK192; MAX IAS 250KT until IBIDI.

Note 2: For the two previous SIDs a minimum climb gradient of 4.1 % (249FT/NM) until passing 1900FT is required due to elevation up to about 2685FT controlling obstacle (catering for possibly-unsurveyed windmills) at about 4NM SE of SKP.
